Independent Auditor's Report

Board of Directors
Prospect EOGH, Inc.
East Orange, New Jersey

We have audited the accompanying consolidated financial statements of Prospect EOGH, Inc. (the "Company"), which comprise the consolidated balance sheets as of September 30, 2019 and 2018, and the related consolidated statements of operations, member's deficit, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

BDO USA, LLP, a Delaware limited liability partnership, is the U.S. member of BDO International Limited, a UK company limited by guarantee, and forms part of the international BDO network of independent member firms.

BDO is the brand name for the BDO network and for each of the BDO Member Firms.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Prospect EOGH, Inc. as of September 30, 2019 and 2018, and the results of their operations and their cash flows for the years then ended, in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in Note 1, the Company is financially dependent on its parent, Prospect Medical Holdings, Inc., which has agreed to provide the financial support necessary for the operations of the entity. The accompanying consolidated financial statements do not reflect any adjustments or disclosures that would be required should the parent company discontinue its financial support.

1. Organization

Prospect EOGH, Inc. (“EOGH” or the “Company”) is a wholly-owned subsidiary of Prospect NJ, Inc. (“PNJ”). PNJ is wholly owned by Prospect Medical Holdings, Inc. (“Prospect” or “PMH”). EOGH operates a 212-bed acute care general hospital which provides healthcare services in East Orange, New Jersey and surrounding communities.

The Company is dependent on Prospect to fund ongoing operations. As of September 30, 2019, the Company had a liability of $102,223,000 due to Prospect, which is payable on demand, does not bear interest, and is included in due to affiliated companies, net in the accompanying consolidated balance sheets. Prospect does not intend to have the Company repay the liability in a manner which would impair the Company’s ability to maintain sufficient liquidity to sustain ongoing operations.

During the year ended September 30, 2019, Prospect made the determination to sell the operations of the Company. Negotiations continue with a number of potential buyers with respect to the anticipated sale. Prospect’s decision to sell the operations of the Company was based on its historical financial results. In connection with this decision, under applicable accounting literature, the Company was required to test the long-lived assets for impairment as of September 30, 2019. Under this test, the Company recorded impairment of property, improvements and equipment, net of $51,991,000, and as a result the assets have been brought down to their net realizable value.

2. Significant Accounting Policies

Principles of Consolidation and Basis of Presentation

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) and include the accounts of EOGH’s wholly-owned subsidiary, Prospect EOGH Hospital Properties Urban Renewal, LLC, but do not include the accounts of PNJ or Prospect. All significant intercompany balances and transactions have been eliminated in consolidation.

Revenues

Net Patient Service Revenues

Operating revenue consists primarily of net patient service revenue. The Company reports net patient service revenue at the estimated net realizable amounts from patients and third-party payers and others in the period in which services are rendered. The Company has agreements with third-party payers, including Medicare, Medicaid, managed care and other insurance programs that are paid at negotiated rates. These payment arrangements include prospectively determined rates per discharge, reimbursed costs, discounted charges and per diem payments, as further described below. Estimates of contractual allowances are based upon the payment terms specified in the related contractual agreements. The Company accrues for amounts that it believes may ultimately be due to or from the third-party payers. Normal estimation differences between final settlements and amounts accrued in previous years are reported as changes in estimates in the current year. Outstanding receivables, net of allowances for contractual discounts and bad debts, are included in patient accounts receivable in the accompanying consolidated balance sheets.

The following is a summary of sources of net patient service revenues (net of contractual allowances and discounts) before provision for bad debts (in thousands):

For the years ended September 30,	**2019**	2018
Medicare	**$ 32,113**	$ 37,625
Medicaid	**25,782**	30,381
Managed Care	**17,517**	12,069
Self-Pay/Other	**11,158**	8,259
Total	**$ 86,570**	$ 88,334

A summary of the payment arrangements with major third-party payers follows:

Medicare: Medicare is a federal program that provides certain hospital and medical insurance benefits to persons aged 65 and over, some disabled persons with end-stage renal disease and certain other beneficiary categories. Inpatient services rendered to Medicare program beneficiaries are paid at prospectively determined rates per discharge, according to a patient classification system based on clinical, diagnostic, and other factors. Outpatient services are paid based on a blend of prospectively determined rates and cost-reimbursed methodologies. The Company is also reimbursed for various disproportionate share and Medicare bad debt components at tentative rates, with final settlement determined after submission of the annual Medicare cost report and audit thereof by the Medicare fiscal intermediary. Normal estimation differences between filed settlements and amounts accrued are reflected in net patient service revenue in the year the settlement occurs.

Cost report settlement estimates are recorded based upon as-filed cost reports and are adjusted for tentative settlements, if any, and when a final Notice of Program Reimbursement ("NPR") is issued in the year the settlement occurs.

Medicaid: Medicaid is a joint federal-state funded healthcare benefit program that is administered by states to provide benefits to qualifying individuals who are unable to afford care. The Company receives reimbursements under the Medicaid program at prospectively determined rates for both inpatient and outpatient services. Similar to Medicare, cost report settlements are recorded based upon as-filed cost reports and adjusted for tentative and final settlements, if any, in the year the settlement occurs.

The New Jersey Health Care Reform Act of 1992 established Health Care Subsidy Funds to provide certain hospitals in New Jersey with funds necessary to provide charity care and other forms of uncompensated care. EOGH recognized revenue related to this program of $2,001,000 and $815,000 for the years ended September 30, 2019 and 2018, respectively.

Managed Care: The Company has also entered into payment agreements with certain commercial insurance carriers, health maintenance organizations ("HMOs"), and preferred provider organizations ("PPOs"). The basis for payment under these agreements is in accordance with negotiated contracted rates or at the Company's standard charges for services provided.

Self-Pay: Self-pay patients represent those patients who do not have health insurance and are not covered by some other form of third-party arrangement. Such patients are evaluated, at the time of services or shortly thereafter, for their ability to pay based upon federal and state poverty guidelines, qualifications for Medicaid, as well as the Company's indigent and charity care policy.

Laws and regulations governing the third-party payor arrangements are extremely complex and subject to interpretation. As a result, there is at least a reasonable possibility that recorded estimates will change by a material amount in the near term. Normal estimation differences between subsequent cash collections on patient accounts receivable and net patient accounts receivable estimated in the prior year are reported as adjustments to net patient service revenue in the current period.

The Company is not aware of any material claims, disputes, or unsettled matters with any payers that would affect revenues that have not been adequately provided for and disclosed in the accompanying consolidated financial statements.

Charity Care

The Company provides charity care to patients who lack financial resources and are deemed to be medically indigent based on criteria established under the Company's charity care policy. This care is provided without charge or at amounts less than the Company's established rates. Because the Company does not pursue collection of amounts determined to qualify as charity care, such amounts are not reported as revenue. The direct and indirect costs related to this care totaled $4,733,000 and $4,631,000 for the years ended September 30, 2019 and 2018, respectively. Direct and indirect costs for providing charity care are estimated by calculating a ratio of cost to gross charges and then multiplying that ratio by the gross uncompensated charges associated with providing care to charity patients. In addition, the Company provides services to other medically indigent patients under various state Medicaid programs. Such programs pay amounts that are less than the cost of the services provided to the recipients. The Company has not changed its charity care or uninsured discount policies during the years ended September 30, 2019 or 2018.

Provisions for Contractual Allowances and Doubtful Accounts

Collection of receivables from third-party payers and patients is the Company's primary source of cash and is critical to its operating performance. The Company closely monitors its historical collection rates, as well as changes in applicable laws, rules and regulations and contract terms, to assure that provisions for contractual allowances are made using the most accurate information available. However, due to the complexities involved in these estimations, actual payments from payers may be materially different from the amounts management estimates and records. The Company's primary collection risks relate to uninsured patients and the portion of the bill which is the patient's responsibility, primarily co-payments and deductibles. Payments for services may also be denied due to issues over patient eligibility for medical coverage, the Company's ability to demonstrate medical necessity for services rendered and payer authorization of hospitalization.

Accounts receivable are reduced by an allowance for doubtful accounts. Valuation of the collectability of accounts receivable and provision for bad debts is based on historical collection experience, payer mix and the age of the receivables. Management routinely reviews accounts receivable balances in conjunction with these factors and other economic conditions which might

ultimately affect the collectability of the patient accounts, and makes adjustments to the Company's allowances as warranted. For receivables associated with services provided to patients who have third-party coverage, management analyzes contractually due amounts and subsequently calculates an allowance for doubtful accounts and provision for bad debts once the age of the accounts reaches a specific age category based on historical experience. For receivables associated with self-pay patients, management records a significant provision for bad debts beginning in the period services were provided based on past experience that many patients are unable or unwilling to pay the portion of their bill for which they are financially responsible. The allowance for doubtful accounts as a percent of gross patient accounts receivable was 68% and 76% at September 30, 2019 and 2018, respectively. The Company fully reserves for all patient accounts receivable over 365 days old.

Other Non-Patient Hospital Revenues and Other Receivables

Other non-patient Hospital revenues totaled $3,417,000 and $1,591,000 for the years ended September 30, 2019 and 2018, respectively, which includes grant revenues. Management has evaluated the collectability of other receivables consisting primarily of other revenues and grant revenues and determined no allowance is necessary as of September 30, 2019 and 2018, respectively.

Legislation

The Company's hospital facilities are subject to the Emergency Medical Treatment and Active Labor Act ("EMTALA"). This federal law requires any hospital that participates in the Medicare program to conduct an appropriate medical screening examination of every person who presents to the hospital's emergency department for treatment and, if the patient is suffering from an emergency medical condition, to either stabilize that condition or make an appropriate transfer of the patient to a facility that can handle the condition. The obligation to screen and stabilize emergency medical conditions exists regardless of a patient's ability to pay for treatment. There are severe penalties under EMTALA if a hospital fails to screen or appropriately stabilize or transfer a patient or if the hospital delays appropriate treatment in order to first inquire about the patient's ability to pay. Penalties for violations of EMTALA include civil monetary penalties and exclusion from participation in the Medicare program. In addition, an injured patient, the patient's family or a medical facility that suffers a financial loss as a direct result of another hospital's violation of the law can bring a civil suit against that other hospital. The Company believes that it is in compliance with EMTALA and is not aware of any pending or threatened EMTALA investigations involving allegations of potential wrongdoing that would have a material effect on the Company's consolidated financial statements.

Property, Improvements and Equipment, Net

Property, improvements and equipment are stated on the basis of cost or, in the case of acquisitions, at their acquisition date fair values less accumulated depreciation. Depreciation is provided using the straight-line method over the estimated useful lives of the assets, and amortization of leasehold improvements is provided using the straight-line basis over the shorter of the remaining lease period or the estimated useful lives of the leasehold improvements. Building improvements are generally depreciated over seven years, buildings are depreciated over 10 years, equipment is depreciated over three to seven years and furniture and fixtures are depreciated over five to seven years. Equipment capitalized under capital lease obligations are amortized over the lesser of the life of

the lease or the useful life of the asset. During the year ended September 30, 2019, the Company recorded impairment of property, improvements and equipment (see Note 3).

Goodwill

Goodwill represents the excess of the consideration paid and liabilities assumed over the fair value of the net assets acquired, including identifiable intangible assets.

Goodwill is not amortized; rather it is reviewed annually for impairment for each reporting unit, or more frequently if impairment indicators arise. Impairment is the condition that exists when the carrying amount of goodwill exceeds its implied fair value. The Company's annual goodwill impairment test is conducted on July 1. Impairment of goodwill is tested at the reporting unit level, by comparing the reporting unit's carrying amount, including goodwill, to the fair value of the reporting unit. The fair value of the reporting units are estimated. In evaluating whether indicators of impairment exist, the Company considers adverse changes in market value, laws and regulations, profitability, cash flows, ability to maintain enrollment and renew payer contracts at favorable terms, among other factors. The goodwill impairment test is a one-step process which consists of estimating based on a weighted combination of (i) the guideline company method that utilizes revenue or earnings multiples for comparable publicly-traded companies, and (ii) a discounted cash flow model. If the estimated fair value of the reporting unit is less than its carrying value, this indicates that goodwill is impaired, and impairment is recorded based on the deficiency of fair value compared to the carrying value. The Company's impairment test related to goodwill during the year ended September 30, 2018 resulted in a full impairment of goodwill. There was no goodwill as of or during the year ended September 30, 2019.

Long-Lived Assets and Amortizable Intangibles

Intangible assets include trade names. The Company reviews long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. The Company considers assets to be impaired and writes them down to fair value if estimated undiscounted cash flows associated with those assets are less than their carrying amounts. Fair value is based upon the present value of the associated cash flows. Changes in circumstances (for example, changes in laws or regulations, technological advances or changes in strategies) may also reduce the useful lives from initial estimates. Changes in planned use of intangibles may result from changes in customer base, contractual agreements, or regulatory requirements. In such circumstances, management will revise the useful life of the long-lived asset and amortize the remaining net book value over the adjusted remaining useful life. During the year ended September 30, 2019, the Company recorded impairment of property, improvements and equipment (see Note 3). No impairment was recorded for the year ended September 30, 2018.

Insurance Reserves

Medical Malpractice Liability Insurance

Prospect has a captive insurance company based in the Cayman Islands, Connecticut Healthcare Insurance Company ("CHIC"), which provides hospital and physician professional and general liability coverage to all of the Prospect's hospitals and affiliated subsidiaries on a claims-made basis. The individual physicians who contract with the physician organizations carry their own medical malpractice insurance, some of which may be purchased from CHIC. The Company's

hospitals carry professional and general liability insurance to cover medical malpractice claims under claims-made policies. Under the policies, insurance premiums cover only those claims actually reported during the policy term. Should the claims-made policy not be renewed or replaced with equivalent insurance, claims related to occurrences during the policy term but reported subsequent to the policy's termination may be uninsured. The Company's hospitals have a consolidated policy for professional and general liability insurance with separate retentions for each entity.

During the year ended September 30, 2018, CHIC provided malpractice and general liability ($2,000,000 per occurrence) coverage. During the year ended September 30, 2019, CHIC provided malpractice and general liability ($5,000,000 per occurrence and $37,000,000 in the aggregate) coverage. CHIC also provided an excess healthcare professional liability and umbrella liability insurance policy on a claims-made basis covering healthcare professional liability, general liability, automobile liability, employers' liability, helipad liability and non-owned aircraft liability. The limit provided was $80,000,000 and $60,000,000 (during the years ended September 30, 2019 and 2018, respectively) for each loss event and in the annual aggregate excess of the primary coverage layers described above. This coverage was fully reinsured by third party carriers.

GAAP requires that a health care organization record and disclose the estimated costs of medical malpractice claims in the period of the incident of malpractice, if it is reasonably possible that liabilities may be incurred and losses can be reasonably estimated. The Company recognizes an estimated liability for incurred but not reported claims and the self-insured risks (including deductibles and potential claims in excess of policy limits) based upon an actuarial valuation of the Company's historical claims experience of the Company's hospitals. The Company's gross claims liability was $1,992,000 and $2,312,000 as of September 30, 2019 and 2018, respectively. The gross claims liability for September 30, 2019 and 2018 was estimated using a discount factor of 4% and is included within malpractice reserves in the accompanying consolidated balance sheets.

Workers' Compensation Insurance

The Company was fully insured for workers' compensation claims with no deductible during the years ended September 30, 2019 and 2018.

Reserve Methodology

The claims reserve is based on the best data available to the Company. The estimate, however, is subject to a significant degree of inherent variability. The estimate is continually monitored and reviewed, and as the reserve is adjusted, the difference is reflected in current operations. While the ultimate amount of medical malpractice liability is dependent on future developments, management is of the opinion that the associated liabilities recognized in the accompanying consolidated financial statements are adequate to cover such claims. Management is not aware of any potential medical malpractice claims whose settlement, if any, would have a material adverse effect on the Company's financial position, results of operations or cash flows.

Cash and Cash Equivalents

The Company considers all highly liquid debt instruments with initial maturities of 90 days or less to be cash equivalents. Cash and cash equivalents are primarily comprised of deposits with banks. The Company maintains its cash at banks with high credit-quality ratings.

Inventories

Inventories of supplies are valued at the lower of amounts that approximate the weighted average cost or net realizable value, which approximates market value, and are expensed as incurred. Inventories consist primarily of medical and surgical supplies and pharmaceuticals.

Income Taxes

Deferred income tax assets and liabilities are recognized for differences between financial and income tax reporting bases of assets and liabilities based on enacted tax rates and laws. To the extent a deferred tax asset cannot be recognized under the preceding criteria, allowances must be established. The impact on deferred taxes of changes in tax rates and laws, if any, are applied to the years during which temporary differences are expected to be settled and reflected in the financial statements in the period of enactment. The Company recognizes interest and penalties associated with income tax matters and unrecognized tax benefits in the income tax expense line item of the consolidated statements of operations. For the years ended September 30, 2019 and 2018, the Company did not incur any interest and penalties related to income taxes.

An entity is required to evaluate its tax positions using a two-step process. First, the entity should evaluate the position for recognition. An entity should recognize the financial statement benefit of a tax position if it determines that it is more likely than not that the position will be sustained on examination. Next, the entity should measure the amount of benefit that should be recognized for those tax positions that meet the more likely than not test.

Accounting Standards require that the consolidated amount of current and deferred tax expense for a group, that files a consolidated tax return, be allocated among the group members when those members issue separate financial statements. The Company is a member of a consolidated group which files consolidated and combined returns for federal and state, respectively, with its ultimate parent company. The Company adopts the separate return method modified for benefits-for-loss in provisioning for current and deferred income taxes. Under this method, the subsidiary is assumed to file a separate return with the taxing authority, thereby reporting its taxable income or loss and paying the applicable tax to or receiving the appropriate refund from the parent. However, when the benefit of the net operating loss and other tax attribute is recognized in the consolidated financial statements, the subsidiary would generally reflect a benefit in its financial statements.

Under the separate return method, the carve-out entity calculates its tax provision as if it were filing its own separate tax return based on the pre-tax accounts included in the carve-out entity. This can result in perceived inconsistencies between the tax provision of the carve-out entity and the tax provision of the consolidated group. This is acceptable, as Accounting Standards Codification ("ASC") 740 acknowledges that if the separate return method is used, the sum of the amounts allocated to individual members of the group may not equal the consolidated amount.

Fair Value of Financial Instruments

Financial instruments consist primarily of cash and cash equivalents, patient and other accounts receivables, accounts payable and other accrued liabilities, accrued salaries, wages and benefits, amounts due from(to) government payers, capital lease obligations, note payable, malpractice reserves and other liabilities. The carrying amounts of current assets and liabilities approximate

their fair value due to the relatively short period of time between the origination of the instruments and their expected realization.

Nonfinancial assets such as goodwill and identifiable intangible assets are measured at fair value when there is an indicator of impairment and recorded at fair value only when impairment is recognized. The Company performs an annual impairment test on the goodwill, and performs an impairment test on the intangible assets when there are indications of impairment.

During the year ended September 30, 2018, the Company recorded $4,572,000 of impairment relating to goodwill, which is reflected in the accompanying consolidated statements of operations.

The Company uses the discounted cash flow approach, the guideline public company approach and the guideline transactions approach to estimate the residual value of the Company's goodwill. The measurement of goodwill is a Level 3 measurement.

The following table provides quantitative information related to the significant unobservable inputs to determine fair value and impairment of goodwill as of September 30, 2018:

Residual Value of Goodwill	Valuation Technique	Unobservable Input	Rates
$ -	Discounted Cash Flow	Weighted average cost of capital	9.3%
		Revenue growth rate	(1.8)% - 11.2%
	Guideline Public Company	LTM and NTM Revenue multiple	0.5x

For the year ended September 30, 2019 there was no goodwill or impairment of goodwill. As such, there were no nonrecurring measurements as of September 30, 2019.

Concentrations of Credit Risk

Cash and cash equivalents are maintained at financial institutions and, at times, balances may exceed federally insured limits of $250,000 per depositor of each financial institution. The Company has not experienced any losses to date related to these balances.

Financial instruments that potentially subject the Company to concentrations of credit risk consist of receivables due from Medicare and Medicaid. The Company received revenues from Medicare and Medicaid as follows (in thousands):

	2019	**% of Net Patient Services Revenues**	2018	% of Net Patient Services Revenues
Medicare	**$ 32,113**	**37%**	$ 37,625	43%
Medicaid	**25,782**	**30%**	30,381	34%
Total	**$ 57,895**	**67%**	$ 68,006	77%

Use of Estimates

The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and the disclosure of contingent assets and liabilities at the dates, and for the periods, that the consolidated financial statements are prepared. Actual results could materially differ from those estimates. Principal areas requiring the use of estimates include third party settlements, amounts due from (to) government payers, allowances for contractual discounts and doubtful accounts, malpractice reserves, and impairment of long-lived assets and intangible assets.

New Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-09, "Revenue from Contracts with Customers (Topic 606)" with an effective date deferred by ASU 2015-14. The core principle of ASU 2014-09 is built on the contract between a vendor and a customer for the provision of goods and services, and attempts to depict the exchange of rights and obligations between the parties in the pattern of revenue recognition based on the consideration to which the vendor is entitled. To accomplish this objective, the standard requires five basic steps: (i) identify the contract with the customer, (ii) identify the performance obligations in the contract, (iii) determine the transaction price, (iv) allocate the transaction price to the performance obligations in the contract, (v) recognize revenue when (or as) the entity satisfies a performance obligation. Nonpublic entities will apply the new standard for annual periods beginning after December 15, 2018, and interim periods within fiscal years beginning after December 15, 2019. Three basic transition methods are available — full retrospective, retrospective with certain practical expedients, and a cumulative effect approach. Under the third alternative, an entity would apply the new revenue standard only to contracts that are incomplete under legacy U.S. GAAP at the date of initial application and recognize the cumulative effect of the new standard as an adjustment to the opening balance of retained earnings. That is, prior years would not be restated and additional disclosures would be required to enable users of the financial statements to understand the impact of adopting the new standard in the current year compared to prior years that are presented under legacy U.S. GAAP. The Company is currently evaluating the effect of this guidance on its consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02, "Leases (Topic 842)". The core principle of ASU 2016-02 is that a lessee should recognize the assets and liabilities that arise from leases, including operating leases. Under the new requirements, a lessee will recognize in the statement of financial position a liability to make lease payments (the lease liability) and the right-of-use asset representing the right to the underlying asset for the lease term. For leases with a term of 12 months or less, the lessee is permitted to make an accounting policy election by class of underlying asset not to recognize lease assets and lease liabilities. The recognition, measurement, and presentation of expenses and cash flows arising from a lease by a lessee have not significantly changed from previous GAAP. The standard was originally scheduled to effective for nonpublic entities for fiscal years beginning after December 15, 2019. In November 2019 the FASB issued ASU 2019-10, "Financial Instruments—Credit Losses (Topic 326), Derivatives and Hedging (Topic 815), and Leases (Topic 842)" which delayed the effective date by one year to December 2020. The Company is currently evaluating the standard and the impact on its consolidated financial statements and footnote disclosures.

In August 2016, the FASB issued ASU 2016-15, "Statement of Cash Flows (Topic 230)". The updated standard addresses eight specific cash flow issues with the objective of reducing diversity in

practice. ASU 2016-15 is effective for non-public business entities for annual reporting periods beginning after December 15, 2018, including interim periods within those annual reporting periods. Early adoption is permitted. The Company is assessing the impact of the adoption of ASU 2016-15 on its consolidated financial statements.

Reclassifications

Certain amounts included in the fiscal year 2018 consolidated financial statements have been reclassified to conform to the fiscal year 2019 presentation.

3. Property, Improvements and Equipment, Net

Property, improvements and equipment, net consisted of the following (in thousands):

September 30,	**2019**	2018
Property, improvements and equipment:		
Land and land improvements	**$ 341**	$ 4,152
Buildings and improvements	**14,614**	38,409
Equipment	**10,992**	12,991
	25,947	55,552
Less: accumulated depreciation	**(16,601)**	(11,378)
	9,346	44,174
Construction in Progress	**86**	16,477
Property, improvements and equipment, net	**9,432**	60,651

At September 30, 2019 and 2018, the Company had assets under capitalized leases of $2,165,000 and $8,944,000 and related accumulated depreciation of $1,813,000 and $7,490,000, respectively.

Depreciation expense was $6,911,000 and $4,791,000 for the years ended September 30, 2019 and 2018, respectively.

In connection with Prospect's decision to sell East Orange General Hospital, the Company was required to test the long-lived assets for impairment as of September 30, 2019, under applicable accounting literature. Under this test, the Company recorded impairment of property, improvements and equipment, net of $51,991,000, which is included in the consolidated statements of operations.

4. Goodwill and Intangible Assets, Net

The changes in the carrying amount of goodwill for the years ended September 30, 2019 and 2018 are as follows (amounts in thousands):

For the Years Ended September 30,		**2019**		2018
Balance, beginning of year	**$**	**-**	$	4,572
Impairment		**-**		(4,572)
Balance, end of year	**$**	**-**	$	-

Identifiable intangible assets are comprised of tradenames (in thousands):

September 30,	Amortization Period	**2019**		2018
Total acquisition cost of intangible assets	10 years	**2,039**	$	2,039
Less accumulated amortization		**(484)**		(242)
Intangible assets, net		**1,555**	$	1,797

Amortization is recognized on a straight-line basis (management's best estimate of the period of economic benefit) over the respective useful lives. Amortization expense was $242,000 for each of the years ended September 30, 2019 and 2018, respectively.

Estimated amortization expense for each future fiscal year is as follows (in thousands):

Years ended September 30,		
2020	$	242
2021		242
2022		242
2023		242
2024		242
Thereafter		345
Total	$	1,555

The weighted-average remaining useful life for the intangible assets was approximately 6 years as of September 30, 2019.

5. Related Party Transactions

The Company has transactions with Prospect and fellow subsidiaries of Prospect related to payments that may be made on behalf of the Company, and vice versa. For the year ended September 30, 2018, Prospect financed capital expenditures on behalf of the Company totaling $16,828,000. At September 30, 2019 and 2018, the Company had a net payable due to Prospect in the amount of $102,223,000 and $60,661,000, respectively, which is reflected in due to affiliated companies, net on the accompanying consolidated balance sheets.

6. Income Taxes

The components of the income tax (benefit) provision are as follows (in thousands):

For the years ended September 30,	**2019**	2018
Current:		
Federal	**$ (129)**	$ 186
State	**20**	-
	(109)	186
Deferred:		
Federal	**-**	3,337
State	**-**	-
	-	3,337
Total:		
Federal	**(129)**	3,523
State	**20**	-
	$ (109)	$ 3,523

Remainder of this page intentionally left blank.

Temporary differences and carry forward items that result in deferred income tax balances as of September 30, 2019 and 2018, respectively, are as follows (in thousands):

September 30,	**2019**	2018
Deferred tax assets:		
Net operating loss carryforwards	**$ 24,962**	$ 7,754
Allowances for bad debts	**14**	2,612
Vacation accrual	**324**	371
Fixed assets	**9,027**	-
Prepaid	**2**	-
Interest expense limitation	**224**	-
Malpractice reserve	**-**	27
Severance accruals	**-**	1,040
State taxes	**24**	-
Deferred tax assets	**34,577**	11,804
Valuation allowance	**(34,154)**	(10,022)
Net deferred tax assets	**423**	1,782
Deferred tax liabilities:		
Fixed assets	**-**	(1,457)
Prepaids	**(263)**	(183)
Intangibles	**(160)**	(86)
State taxes	**-**	(56)
Deferred tax liabilities	**(423)**	(1,782)
Net deferred tax assets	**$ -**	$ -

Deferred tax assets and liabilities reflect the effect of temporary differences between the assets and liabilities recognized for financial reporting purposes and the amounts recognized for income tax purposes.

The difference between the reported amount of income tax expense and the expected amount of income tax expense applying the federal statutory tax rate is predominately due to the state and local income taxes net of federal benefit and valuation allowance.

The Company is a wholly-owned indirect subsidiary of Ivy Holdings, Inc. (“Ivy Holdings”). Ivy Holdings files consolidated federal and combined state tax returns, which includes Prospect EOGH, Inc. The Company files a separate state return for New Jersey.

The Company’s tax years 2016 and 2017 are open for federal tax examination and generally the states are open for tax years 2015 through 2017 are open for the state tax examination.

During fiscal year 2019, the Company completed Internal Revenue Service (“IRS”) examination for Ivy Holdings, Inc. & Subsidiaries fiscal 2014 through 2016 federal income tax returns without any

adjustment to reported taxable income. Currently the Company is under California Franchise Tax Board examination for tax year 2015. The Company believes that it is reasonably possible that an increase in unrecognized tax benefits may be necessary within the coming year, and these unrecognized tax benefits would primarily impact deferred taxes and taxes payable, and the expected range of potential increase in the unrecognized tax benefits is not expected to be material to the balance sheet nor the income statement.

Management assesses the available positive and negative evidence to estimate whether sufficient future pretax income will be generated to permit use of the existing deferred tax assets. A significant piece of objective negative evidence evaluated was the cumulative pretax losses incurred over the three-year period ended September 30, 2019. Such objective evidence limits the ability to consider other subjective evidence, such as the Company's projections for future growth. On the basis of this evaluation, a valuation allowance of approximately $34,154,000 and $10,022,000 for the years ended September 30, 2019 and September 30, 2018, respectively was recorded. The amount of the deferred tax asset considered realizable, could be adjusted if estimates of future taxable income during the carryforward period are reduced or increased or if negative objective evidence in the form of cumulative losses is no longer present and additional weight is given to subjective evidence such as the Company's projections for growth.

On December 22, 2017, the Tax Cuts and Jobs Act of 2017 (the "TCJA") was signed into law making significant changes to the Internal Revenue Code. Changes include, but are not limited to, a corporate tax rate decrease from 35% to 21% effective for tax years beginning after December 31, 2017, limitations on various business deductions such as executive compensation under Internal Revenue Code §162(m), the transition of U.S international taxation from a worldwide tax system to a territorial system, and a one-time transition tax on the mandatory deemed repatriation of cumulative foreign earnings as of December 31, 2017. The United States federal income tax rate reduction was effective as of January 1, 2018. As a result, the Company has reduced net U.S. deferred tax assets by $1,666,000 in fiscal year 2018.

Remainder of this page intentionally left blank.

7. Commitments and Contingencies

Leases

The Company leases various office facilities and equipment from third parties under non-cancelable operating and capital lease arrangements expiring at various dates through November 2021. Capital leases bear interest at rates ranging from 4.45% to 11.48% per annum.

The future minimum annual lease payments required under leases in effect at September 30, 2019, are as follows (in thousands):

For the years ending September 30,	Capital Leases	Operating Leases
2020	$ 725	$ 49
2021	446	33
2022	226	-
Total minimum lease payments	1,397	$ 82
Less: amounts representing interest	(70)	
	1,327	
Less: current portion	656	
	$ 671	

Lease and rental expense was $342,000 and $562,000 for the years ended September 30, 2019 and 2018, respectively.

Contingent Liability for Borrowings by Prospect

The Company is contingently liable as a guarantor, among others, for amounts borrowed by PMH on credit facilities at September 30, 2019 and the Company is a pledger for all of the transactions that PMH has entered into with affiliates of Medical Properties Trust, Inc. ("MPT"), a publicly traded Real Estate Investment Trust.

On February 22, 2018, PMH entered into an Amended and Restated ABL Credit Agreement (the "ABL Agreement"), by and among PMH (as the borrower), the lenders party thereto and JPMorgan, as administrative agent and collateral agent. The ABL Agreement replaced the previous revolving credit facility. PMH has entered into various amendments to this facility during the year ended September 30, 2019. At September 30, 2019, the maximum revolving commitment was $285.0 million and the credit facility bears interest at a variable base rate plus an applicable spread that is based on excess availability, as further described in the ABL Agreement, which was 6.0%. The ABL Agreement provides for a reduction in the maximum revolving commitment by $20.0 million and $10.0 million upon the future planned closure or disposition of PMH's facilities in Texas and New Jersey, respectively. The agreement matures on February 22, 2023. As of September 30, 2019, the outstanding balance and the available balance on the ABL facility was approximately $70.0 million and $175.6 million, respectively. In January 2020, the maximum revolving commitment decreased by $10.0 million to $275.0 million in connection with the sale of the acute care hospital building at PMH's Texas facility in December 2019.

On August 23, 2019, PMH closed a series of transactions with affiliates of MPT. Under these transactions, PMH sold to MPT its hospital buildings in California (excluding Foothill Regional Medical Center ("Foothill"), Connecticut and Pennsylvania for an aggregate purchase price of $1,386,000,000. Concurrent with the sale transactions, PMH entered into two master lease agreements whereby the hospital properties and related medical office buildings were leased back for an initial 15-year term, with options to extend twice for an additional 5 years each and for a further 4.75-year extension. Monthly rent is defined as 7.5% of the lease base, subject to annual escalation of consumer price index, limited to a minimum of 2% and a maximum of 4%. For the first master lease, PMH has the option to buy the properties at their fair value at the end of the lease term. For the second master lease, PMH has the option to purchase at a price that is fixed at the time of entering into the lease (the "Option Price"). If PMH chooses not to exercise this option, and the fair value at the end of the lease is below the Option Price, then PMH must pay MPT a sum equal to the difference between the fair value and the Option Price. All of the legal entities that are parties to the master lease agreement (which are the hospital entities themselves) provide cross guarantees on all of the obligations to MPT, which guarantees include both lease payments under the master lease as well as indebtedness due to MPT. The balance under sale-leaseback liabilities was $1,331,000,000 at September 30, 2019, as reflected in PMH's consolidated financial statements.

Further, PMH obtained a mortgage on the Foothill property. This mortgage is secured by the buildings at Foothill. The interest on this mortgage is 7.5% per annum and is subject to annual escalation of consumer price index, limited to a minimum of 2% and a maximum of 4%. The maturity date of this loan is in August 2034. MPT can purchase the property on event of default or at end of term, or if Company does not exercise purchase rights for the aforementioned leased properties. Additionally, if the Foothill property is no longer used as collateral for a promissory note payable to Prospect Medical Group, Inc. ("PMG"), then MPT shall have the right to purchase the Foothill property and lease it back to PMH under the master lease agreement, for an amount equal to the outstanding principal balance. The referenced promissory note payable to PMG has been included in the calculation of PMG's Tangible Net Equity in connection with requirements of the California Department of Managed Health Care. The balance under this mortgage loan was $51,276,000 at September 30, 2019, as reflected in PMH's consolidated financial statements.

Additionally, PMH entered into a promissory note (the "TRS Note"), under which MPT has advanced to PMH $112,937,000 related to the value of the properties in Rhode Island. The interest on this note is 7.5% per annum and is subject to annual escalation of consumer price index, limited to a minimum of 2% and a maximum of 4%. The maturity date of this note is the earlier of July 2022 or the conversion to and sale-leaseback of the properties in Rhode Island. The balance under this mortgage loan was $112,215,000 at September 30, 2019, as reflected in PMH's consolidated financial statements.

All of the agreements with MPT are cross-collateralized and cross defaulted. The MPT transaction documents contain certain customary covenants and restrictions and a financial covenant based on EBITDAR performance, and PMH was in compliance with such covenants at September 30, 2019.

The obligations and related interest expense related to these credit facilities and financings are not reflected in the Company's consolidated financial statements as of and for the years ended September 30, 2019 and 2018, as the borrowings are reflected in the separate consolidated financial statements of PMH.

Litigation

The Company is subject to a variety of claims and suits that arise from time to time in the ordinary course of its business, acquisitions, or other transactions. While the Company's management currently believes that resolving all of these matters, individually or in the aggregate, will not have a material adverse impact on the Company's consolidated financial position or results of operations, the litigation and other claims that the Company faces are subject to inherent uncertainties and management's view of these matters may change in the future. Should an unfavorable final outcome occur, there exists the possibility of a material adverse impact on the Company's consolidated financial position, results of operations and cash flows for the period in which the effect becomes probable and reasonably estimable.

Legislation and HIPAA

The healthcare industry is subject to numerous laws and regulations of federal, state and local governments. These laws and regulations include, but are not necessarily limited to, matters such as licensure, accreditation, government healthcare program participation requirements, reimbursement for patient services, and Medicare and Medicaid fraud and abuse. Government activity has continued with respect to investigations and allegations concerning possible violations of fraud and abuse statutes and regulations by healthcare providers. Violations of these laws and regulations could result in expulsion from government healthcare programs together with the imposition of significant fines and penalties, as well as significant repayments for patient services previously billed.

The Company believes that it is in compliance with fraud and abuse regulations as well as other applicable government laws and regulations. Compliance with such laws and regulations can be subject to future government review and interpretation as well as regulatory actions unknown or unasserted at this time.

The Health Insurance Portability and Accountability Act ("HIPAA") assures health insurance portability, reduces healthcare fraud and abuse, guarantees security and privacy of health information, and enforces standards for health information. The Health Information Technology for Economic and Clinical Health Act ("HITECH Act") expanded upon HIPAA in a number of ways, including establishing notification requirements for certain breaches of protected health information. In addition to these federal rules, states have also developed their own standards for the privacy and security of health information as well as for reporting certain violations and breaches (for example, California's Confidentiality of Medical Information Act and Lanterman-Petris Short Act) which in some cases are more stringent. Other federal privacy laws may also apply to certain services provided by the Company, including 42 C.F.R. Part 2, which addresses the confidentiality of substance use disorder records. The Company may be subject to significant fines and penalties if found not to be compliant with these state or federal provisions.

Affordable Care Act

The Patient Protection and Affordable Care Act ("PPACA") has made significant changes to the United States health care system. The legislation impacted multiple aspects of the health care system, including many provisions that change payments from Medicare, Medicaid and insurance companies. Under this legislation, 33 states have expanded their Medicaid programs to cover previously uninsured childless adults, and four additional states voted in 2018 to expand Medicaid or to elect a governor that pledged to expand Medicaid. In addition, many uninsured individuals

have had the opportunity to purchase health insurance via state-based marketplaces, state-based marketplaces using a federal platform, state-partnership marketplaces or the federally-facilitated marketplace. PPACA also implemented a number of health insurance market reforms, such as allowing children to remain on their parents' health insurance until age 26 or prohibiting certain plans from denying coverage based on pre-existing conditions. Nationally, these reforms have reduced the number of uninsured individuals.

It is unclear what changes may be made to PPACA with the divided Congress, current presidential administration, and pending litigation over the validity of PPACA. The Administration has promulgated rules to broaden the availability of coverage options that do not comply with the full range of PPACA requirements for individual market coverage, namely Association Health Plans and Short-Term Limited-Duration Insurance. The Administration has also provided additional guidance on state PPACA waivers. These executive actions have been or may be challenged in court. In addition, the TCJA, passed in December 2017, eliminates the individual mandate penalty under PPACA, effective January 1, 2019. The individual mandate penalty was included in PPACA to address concerns that other market reforms expanding access to coverage might produce adverse selection and higher premiums. The extent to which the repeal of the individual mandate penalty will impact the uninsured rate and future premiums are unclear at this juncture. On December 14, 2018, the United States District Court for the Northern District of Texas ruled that the individual mandate without the penalty is unconstitutional and that PPACA is therefore invalid in its entirety. Litigation on this issue is ongoing, with a decision pending from a panel of the United States Court of Appeals for the Fifth Circuit following oral arguments in July 2019. This litigation along with any future legislative changes to PPACA or other federal and state legislation could have a material impact on the operations of the Company. The Company is continuing to monitor the legislative environment and developments in pending litigation for risks and uncertainties.

Employee Health Plans

The Company maintains self-insured exclusive provider organization ("EPO")/HMO and PPO plans for all eligible employees. Employee health benefits are administered by a third-party claims administrator, based on plan coverage and eligibility guidelines determined by the Company, as well as by collective bargaining agreements. Commercial insurance policies cover per occurrence losses in excess of $160,000. An actuarially estimated liability of approximately $474,000 for incurred but not reported claims is included in due to affiliated companies, net as of September 30, 2019 on the consolidated balance sheets. As of September 30, 2018, $806,000 for incurred but not reported claims is included in accounts payable and other accrued liabilities on the consolidated balance sheets.

Provider Contracts

Many of the Company's payer and provider contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of medical services. Such differing interpretations may not come to light until a substantial period of time has passed following contract implementation. Liabilities for claims disputes are recorded when the loss is probable and can be estimated. Any adjustments to reserves are reflected in current operations in the year determined.

8. Defined Contribution Plan

Prospect sponsors defined contribution plans (the "Plans") covering substantially all employees of Prospect who meet certain eligibility requirements, including the Company. Under the Plans, employees can contribute up to 100% of their compensation up to the IRS deferred annual maximum. The Company may make discretionary matching contributions to the Plan. The Company did not make any contributions to the Plan for the years ended September 30, 2019 or 2018.

9. Subsequent Events

The Company has evaluated subsequent events through February 28, 2020, the date the Company's consolidated financial statements were available for issuance. No events arose during the period which would require adjustments or additional disclosures.
